

TABLE 5: Assessment Instruments That Examine More than One Topic Area (n=4)

<i>Instrument Name, Developer, and Online Availability</i>	<i>Citation Using the Instrument</i>	<i>Instrument Description</i>	<i>Psychometric Properties</i>
<p>1. Feelings and Behavior Questionnaire</p> <p>Based on Resnick & Schnicke (1993)</p> <p>Not located online</p>	<p>Harrison & Murphy (1999)</p>	<p>This questionnaire is designed for administration to female sexual assault survivors. It focuses on emotional and behavioral domains that may be disrupted by sexual assault, including issues concerning safety, trust, power, esteem, and intimacy. There are 11 items. The method of questionnaire administration, the time it takes to administer the questionnaire, and the method of scoring the questionnaire are not reported, although it is noted that it can be used by non-psychologists.</p> <p>It is available in English.</p>	<p>Not reported</p>
<p>2. Forensic and Medical Care Following Sexual Assault Service Education Program Evaluation Questionnaire</p> <p>Parekh, Currie & Brown (2005)</p> <p>Not located online</p>	<p>Parekh, Currie & Brown (2005)</p>	<p>This self-administered questionnaire is designed to assess medical personnel’s knowledge and satisfaction concerning their abilities to treat sexual assault patients. The 11 items are rated on a five-point Likert scale and include questions such as, “How would you rate your abilities in forensic evidence collection?” Additional scoring information and the time necessary to administer the instrument were not reported.</p> <p>It is available in English.</p>	<p>This tool was developed and tested using methods described by Miller (1987) and Wiles and Bligh (1999). No additional details were reported.</p>
<p>3. International Planned Parenthood</p>	<p>Guedes, Bott, & Cuca (2002)</p>	<p>This face-to-face interview is designed for administration to women’s health care providers. It focuses on providers’ knowledge, attitudes and</p>	<p>Not reported</p>

ASSESSMENT INSTRUMENTS THAT EXAMINE MORE THAN ONE TOPIC AREA

<p>Federation, Western Hemisphere Region's (IPPF/WHR's) Survey of Provider Knowledge, Attitudes, and Practices (KAP)</p> <p>International Planned Parenthood Federation, Western Hemisphere Region, Inc. (2000a)</p> <p>http://www.ippfwhr.org/publications/download/monographs/GBV_Manual_E.pdf</p>		<p>practices concerning violence in the lives of their patients. There are approximately 80 questions (most close-ended), that cover a range of topics, including: whether, how often and when providers have discussed violence with clients; what providers perceive of as barriers to screening; what providers do when they identify a client who has experienced violence; attitudes toward women who experience violence; knowledge about the consequences of gender-based violence; and the types of training providers have received in the past. The time to administer the interview is not reported and the method of scoring is not described in detail.</p> <p>It is available in English and Spanish.</p>	
<p>4. Medical Protocol (History Sheet – Sexual Assault)</p> <p>The name of the developer was not reported.</p> <p>Not located online but it is provided in the article by Harrison & Murphy (1999)</p>	<p>Harrison & Murphy (1999)</p>	<p>This assessment tool was designed to be used by clinicians to gather information from patients concerning both health and service delivery issues. It asks patients about their experiences of sexual assault, medico-legal documentation concerning the assault, and sexual histories. There are 47 items. The method of scoring the instrument and the time it takes to administer the instrument is not reported.</p> <p>It is available in English.</p>	<p>Not reported</p>
