DEVELOPING A SHARED GLOBAL RESEARCH AGENDA

Elizabeth Dartnall | Executive Director | SVRI
Why a Global Shared Research Agenda?

- Evidence gaps guide research expenditure
- Assist research planning & fundraising
- Monitoring tool for the field
- Advocacy tool
Elevate research that...

Improves responses to & prevention of VAWG

Redresses inequalities and hierarchies in research

Values multiple forms of evidence & knowledge

Provides a sound practical and empirical foundation for programmes
Our Approach

Developing consensus among a larger group of people through “crowdsourcing” to answer the following research questions:

• What should be the research priorities for VAW prevention over next 2-5 years?
• What are the similarities and differences between the perspectives of researchers, funders, practitioners and those in a position to influence policy?
• What are the implications of these differences and similarities for research on prevention of VAW?
The Process

- Scoping Review
- Call for Research Questions
- Consolidation
- Scoring of Research Questions
- Expert Consultation and Validation Workshop
- Wide Dissemination
