

Barriers and Facilitators to Integrating Health Service Responses to Intimate Partner Violence in Low- and Middle-Income Countries: A Comparative Health Systems and Service Analysis

Manuela Colombini, Colleen Dockerty, and Susannah H. Mayhew

➤ Systematic reviews in LMIC

Key results

➤ 11 studies, of which 7 comprehensive in ANC, PHC, ED

➤ 4 common facilitators (comprehensive):

- clear policies and protocols;
- leadership and management support;
- coordinated referrals and intersectoral collaboration;
- training and support for health workers

➤ Linkages between different individual factors are crucial and lead to a **connected systems level response**

Recommendations and conclusion

➤ importance of including the **wider health system context by addressing multiple and combined health systems elements at the same time**

➤ **process outcomes** considered alongside impact ones to yield contextual information on how interventions are adapted, implemented and integrated
