Psychosocial stressors, discrimination, and social support: risk and protective factors of IPV among poor Ecuadorian and Colombian refugee women

Sarah Treves-Kagan, Amber Peterman, Nisha Gottfredson, Andrés Villaveces, Beth Moracco, Suzanne Maman

RESEARCH OBJECTIVE
Identify risk and protective factors for IPV among women in refugee-hosting communities

METHODS
Longitudinal sample of 1,312 poor women living in Northern Ecuador

WHO measures of emotional, physical, sexual IPV in previous six months

~7 months

Recent IPV (Time 2)

IPV, stressors, and discrimination are common

IPV Risk Factors

IPV Protective Factors

Risk & protective factors (Time 1)

Psychosocial Stressors

Discrimination

- P/S IPV 1.6 (1.1, 2.1); E IPV 1.5 (1.1, 2.0)

Social Support

- P/S IPV 0.95 (0.9, 1.0); E IPV 0.95 (0.9, 0.99)
