Taking stock of the SVRI

58% Heard about SVRI via word of mouth

91% SVRI Update rated most useful resource

Almost half of respondents access SVRI website monthly

What should the SVRI publish more of?

- Research guidelines
- Ethics guidelines
- Research priorities
- Policy briefs
- State of the knowledge

Building Capacity

SVRI should focus capacity building efforts on:
1. Intervention development, scale-up and costing
2. Research tools and methods
3. Standards for quality research

SVRI Grant

51% of respondents are aware of funding opportunities through SVRI projects such as SVRI Grant and SVRI Primary Prevention Project

Funding

What should the SVRI seek funding for?
• Capacity building for research on SIPV
• Research uptake
• Research on-granting

Volunteering

88% of respondents will consider volunteering

Time:
1-3 hours weekly for up to 1 year in the following areas:
• Research support
• Monitoring and evaluation
• Training / coaching
• Proposal writing
• Editing / design

SVRI Forums

1/4 of respondents have attended one or more SVRI Forum

“Clearly SVRI strives to include researchers and practitioners across settings – opportunity for collaboration and networking around real, grassroots-initiated research, not just research done by ‘the biggies’.”

Sexual Violence Research Initiative

This infographic summarizes the key findings of an evaluation conducted by the SVRI during June/July 2016. The results show that the SVRI has a continuing positive impact on the sexual and intimate partner violence knowledge field, and that our members are actively engaging with SVRI resources and other platforms for learning. The results of this evaluation will be used to explore new pathways illuminated by our membership.

SVRI Knowledge Hub
• Most valued resources/activities: SVRI Update, SVRI publications, the website & SVRI Forum.
