SVRI MEMBER'S REQUEST

Request for studies for a scoping review: This is a request for studies for a scoping review focusing on adolescents' experiences of participating in sensitive research, which includes but is not limited to, research on violence, abuse, trauma, sexual and reproductive health etc. The review aims to understand adolescents' views and perceptions of participating in such research, common outcomes of such participation, and what recommendations can be made for future research in this area. If researchers know of studies which focused on adolescents' views or experiences of participating in sensitive research using any methods, I would be grateful to know the details. They can be journal articles, reports from organisations, evaluations etc. I can be reached on lakshmi.neelakantan@ed.ac.uk
