**Evaluating the potential of Comprehensive Sexuality Education (CSE) for prevention of Intimate Partner Violence (IPV) among young people in Mexico City: Data analysis, dissemination, and translation of research to practice.**

# How can CSE contribute to IPV prevention among young people?

Encouraging young people to reflect on gender norms, sexuality and violence

Supporting participants to communicate assertively and support each other

Preparing young people to seek health services and support

Ensuring educators are trained to promote dialogue and address conflict
