SAFETY PARTNERSHIPS WORK ACROSS ALL OF OUR PRODUCTS

How We Approach Member Safety

Bumble's Safety Features

Block & Report

Report behavior that makes you feel uncomfortable.

Deception Detector™

Using AI to identify and remove spam, scam and fake profiles.

Photo Verification

Know the person you're talking to looks like their photos.

ID Verification

Verify with your government ID to let others know you're real.

Review Before Send

Reconsider sending a message that might be against our guidelines.

Private Detector™

Blurring lewd images so you can decide if you want to see it.

Unmatch

Remove a match and their ability to view your profile.

Video Chat & Voice Call

Connect over in-app video or voice call without sharing your number.

Share Date

Let trusted contacts know where you are and who you're with.

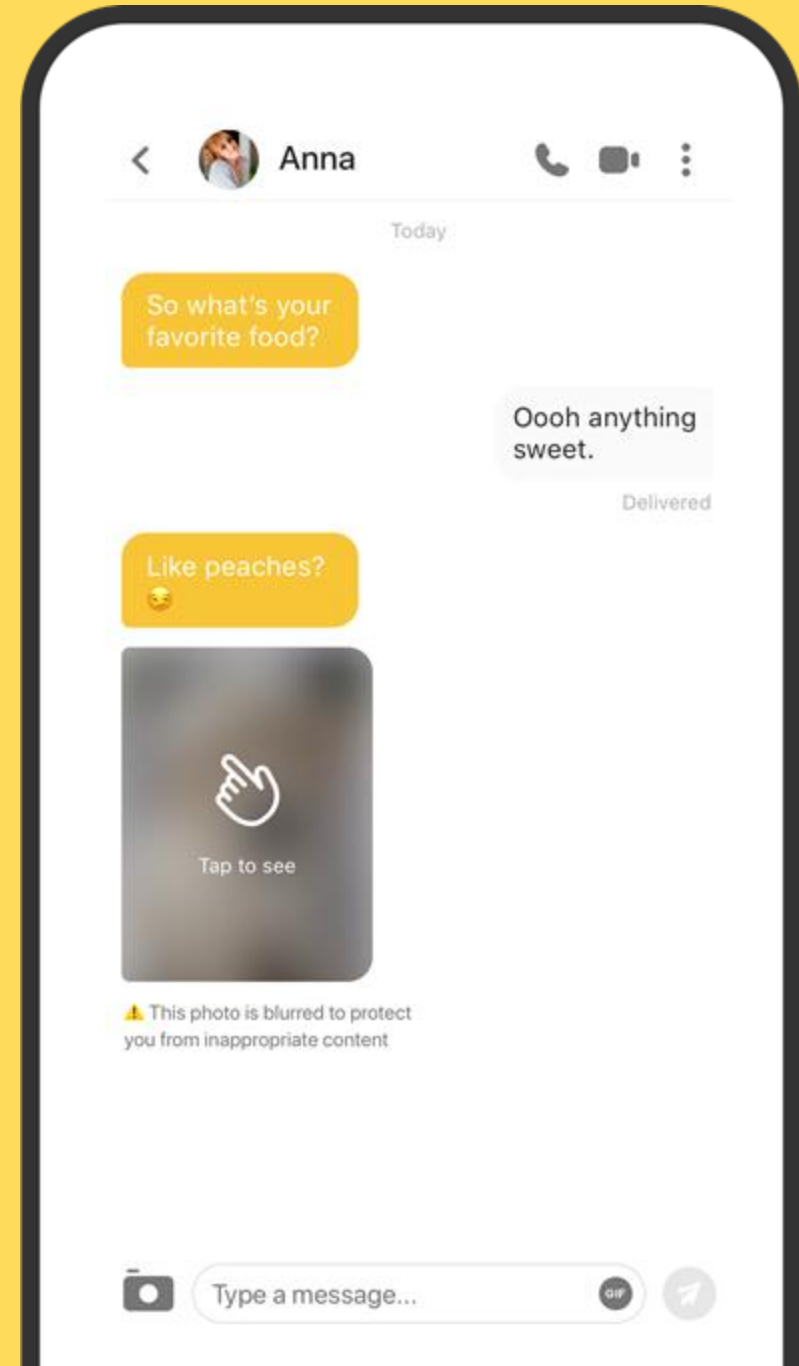

Help Hub

Stay informed on safety features, find resources to help you date with confidence, and track your report.

Private Detector™

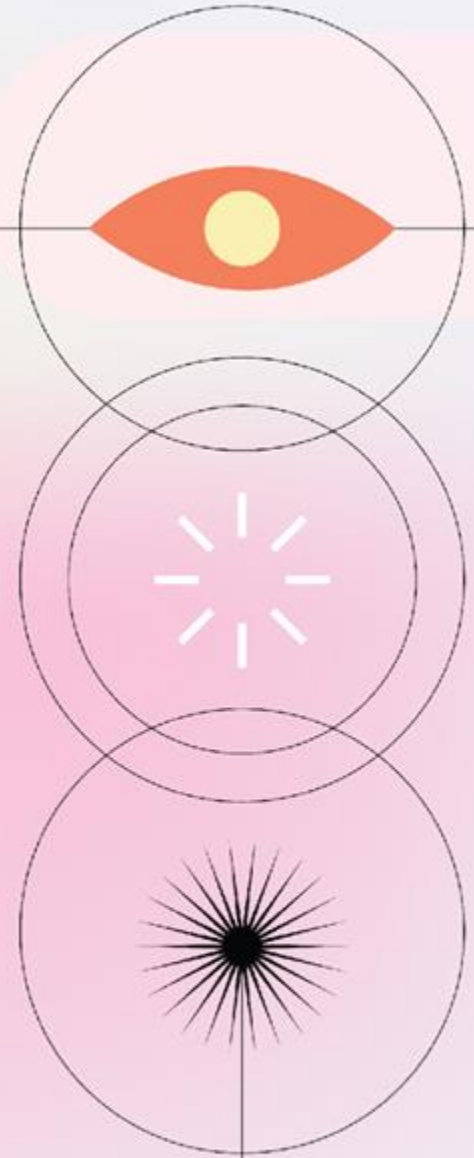

- › **Industry leading solution in 2018**
- › Uses AI to detect and blur lewd images
- › Gives agency to the recipient to decide to view the image, delete it, or report it.
- › **Open-source on GitHub in 2022**

Hyra Basit
Program Manager for the Cyber Harassment Helpline at the
Digital Rights Foundation (DRF) in Pakistan

Bumble's Safety Features

Block & Report

Report behavior that makes you feel uncomfortable.

Deception Detector™

Using AI to identify and remove spam, scam and fake profiles.

Photo Verification

Know the person you're talking to looks like their photos.

ID Verification

Verify with your government ID to let others know you're real.

Review Before Send

Reconsider sending a message that might be against our guidelines.

Private Detector™

Blurring lewd images so you can decide if you want to see it.

Unmatch

Remove a match and their ability to view your profile.

Video Chat & Voice Call

Connect over in-app video or voice call without sharing your number.

Share Date

Let trusted contacts know where you are and who you're with.

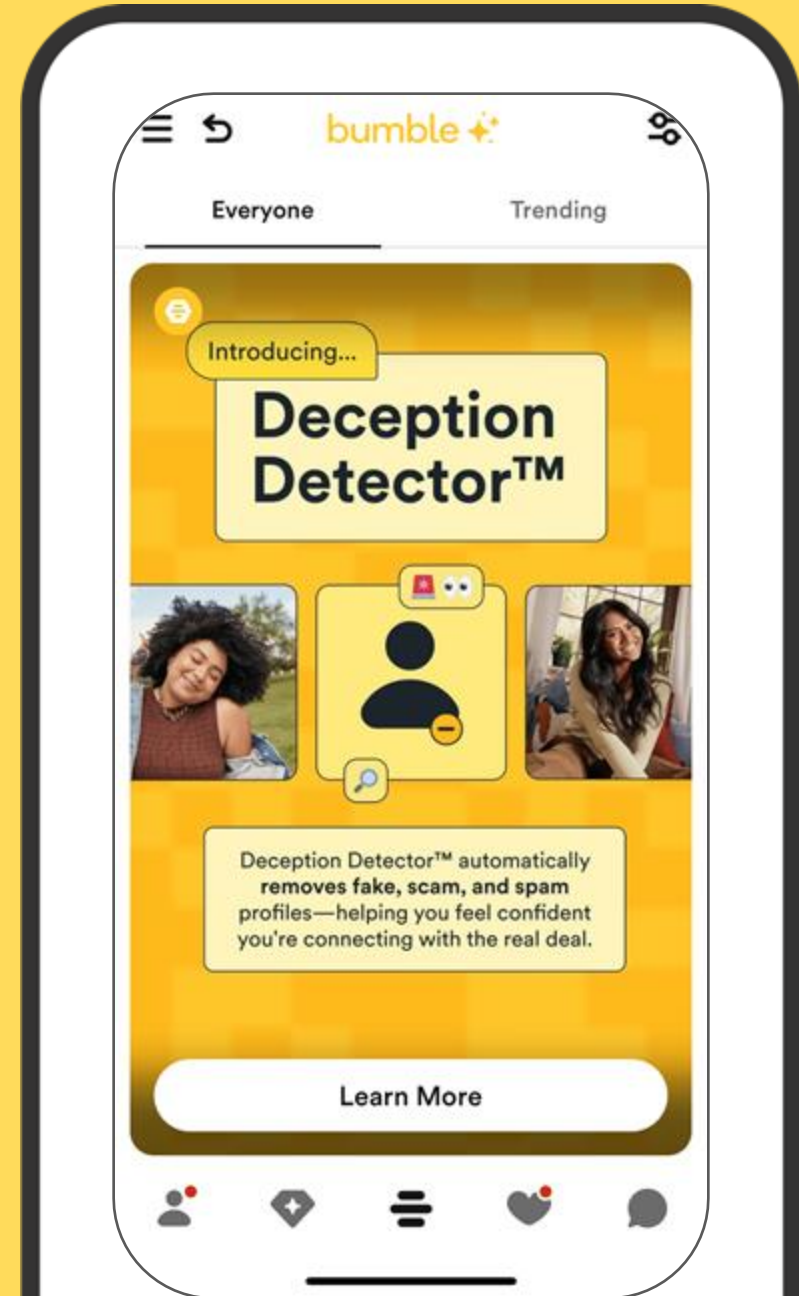

Help Hub

Stay informed on safety features, find resources to help you date with confidence, and track your report.

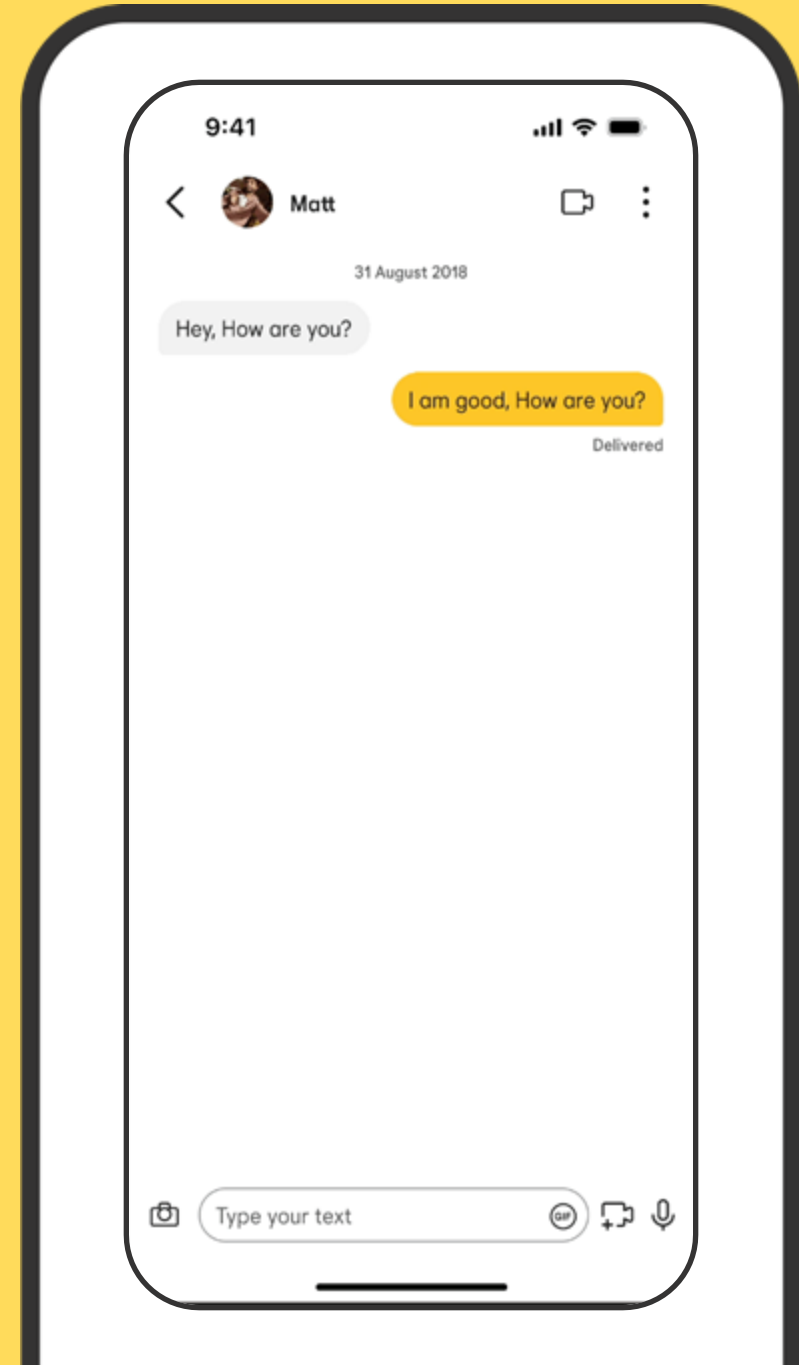

Deception Detector

- › AI-Powered Shield Against Spam, Scams and Fake Profiles
- › 45% decrease in member reports of spam, scam, & fake accounts in first 2 months.

Review Before You Send

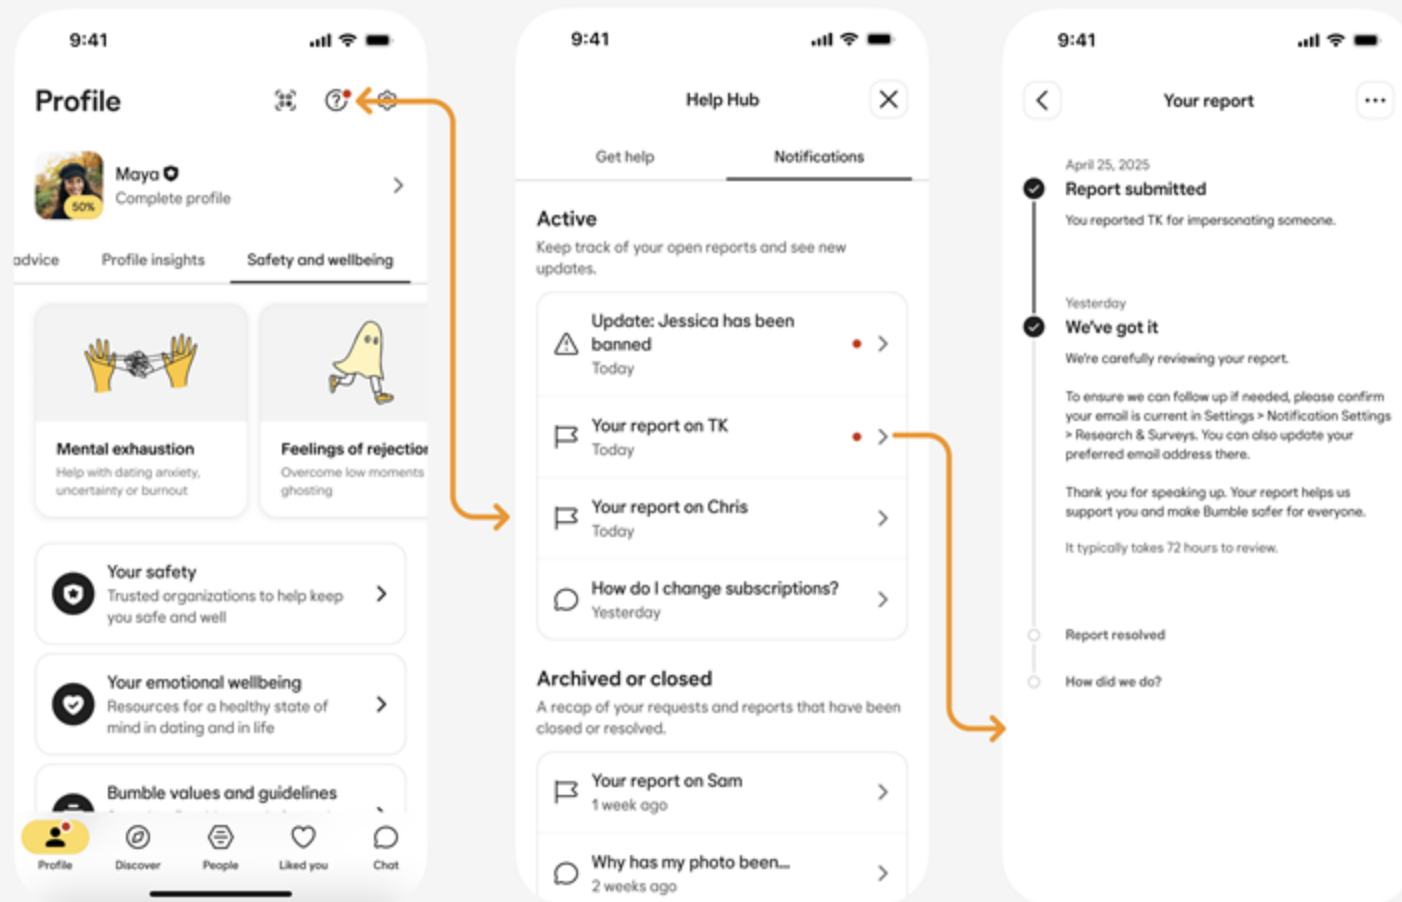

- › Make messages more considerate and respectful
- › 40% of people chose to alter their messages after getting an alert

Our Help Hub

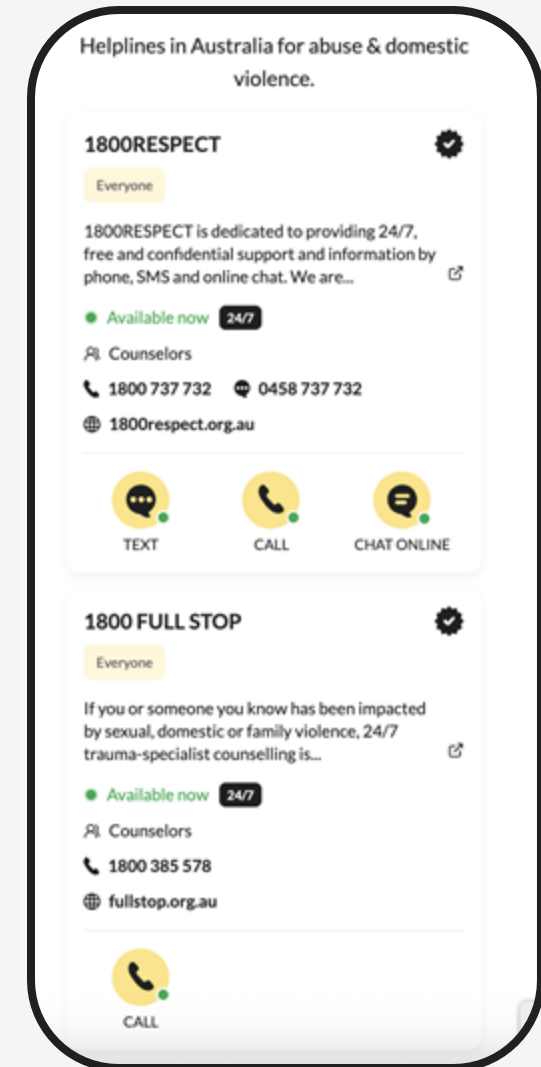

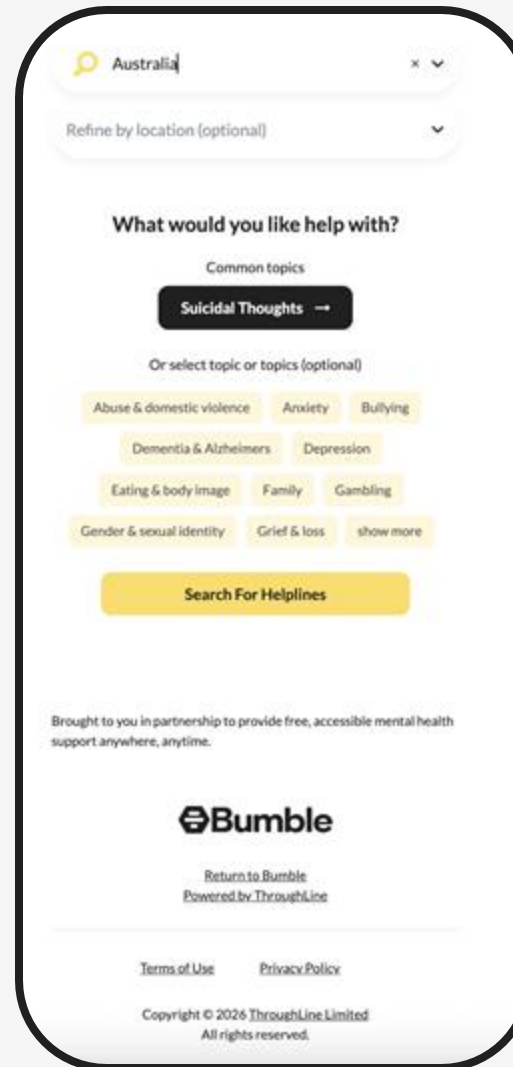

A dedicated space in-app where members can:

- **Seek help and access** safety resources without leaving Bumble
- Get **real-time updates** on their reports from start to resolution
- Access **trauma support through Bloom** for serious safety incidents

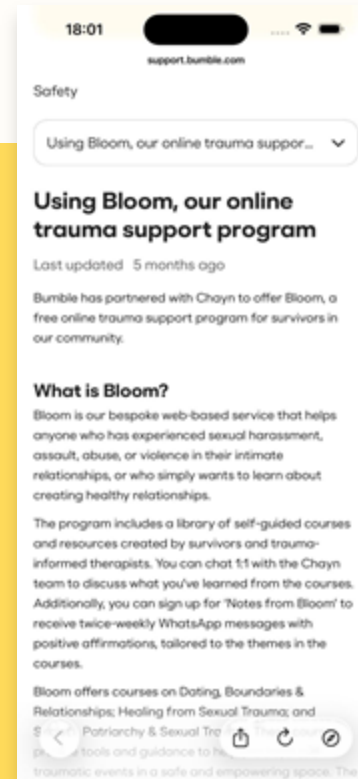

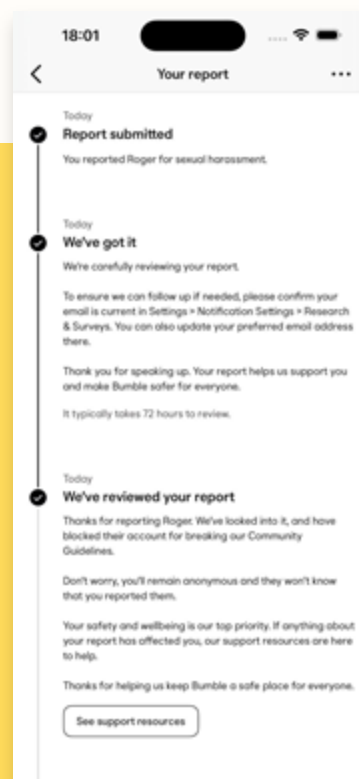

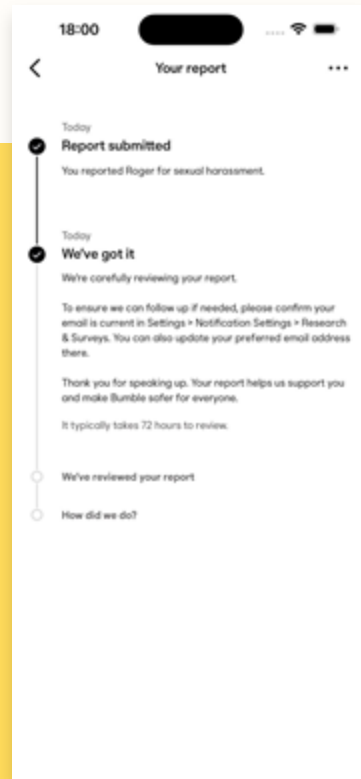

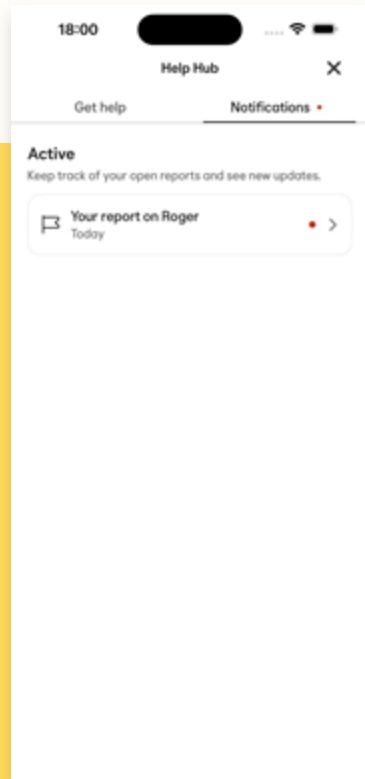

Crisis Referrals

- **Verified real-time crisis referrals** with **Throughline** – the world's largest network of crisis helplines
- **9-point verification system**, including routine validation via human contact by phone
- **Automatic country detection and language support** providing members with the most relevant resources

What Happens to Your Report?

● bloom

In partnership with

≡ Bumble

Together, we can help support survivors around the world.

**Technology-facilitated abuse is the misuse of technology to harass, threaten, coerce, monitor, exploit, and violate another person, including using technology to facilitate physical, sexual, psychological, or economic abuse.*

***Case decisions are based on Community Guidelines and moderation guidance*

Your safety comes first, always

The Bumble Safety Center is here to guide you toward safe and meaningful connections.

Safety features

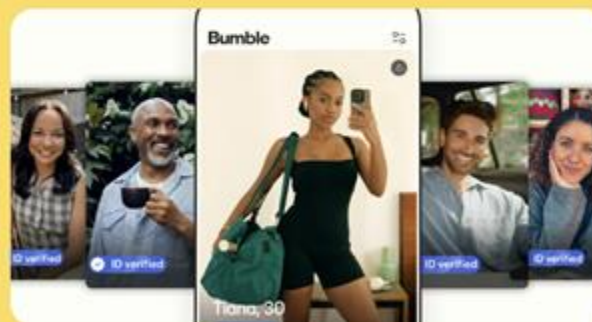

Safety features designed to protect and empower you throughout your dating journey.

Photo Verification

A quick photo to verify the person you're chatting with is real.
